This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

LIBRARIAN'S REPORT

OFFICE OF THE STATE LIBRARIAN,
Des Moines, Iowa, June 30, 1910.

To the Honorable B. F. Carroll,

Governor of Iowa and President of the Board of Trustees of the Iowa State Library:

Sir: I have the honor to submit for your consideration a report for 1910, covering the last biennial period, between the thirtieth day of June, 1908, and the first day of July, 1910.

NUMBER OF BOOKS OF RECORD IN LIBRARY.

At the date of my last report, June 30, 1908, there were of record in the Miscellaneous and Law departments of the State Library 102,371 volumes.

On this 30th day of June, 1910, the total of record in these departments is 112,165 volumes. Total accessions during the biennial period, 9,848. Of these 7,282 represent the additions to the miscellaneous (or general) library, and 2,566 the additions to the law library.

The accessions and whole number of volumes in the Historical department are published in a separate report as provided by statute.

The status of the three departments, directly responsible to the Board, of which the Governor is ex-officio president, remains the same as it was two years ago, owing to the fact that the last General Assembly passed none of the several bills introduced affecting those departments.

That some legislation is desirable is apparent.

THE ARCHIVES DEPARTMENT—

Occupying half of the third floor in the new historical building, temporarily placed in the hands of a competent caretaker, should, in my judgment, be consolidated with the Historical department, and provision should be made for a continuation of the highly important work for which it was created. The work

should be carried on by men of careful training in historical re-research, and in accordance with the general plan outlined by Dr. Shambaugh, of the State Historical Society, in his published report.

LAW AND LEGISLATIVE REFERENCE.

In the absence of legislation authorizing the creation of a legislative reference bureau, and acting on the suggestion implied in the action of the General Assembly in placing the state librarian's legislative reference assistant under the immediate supervision of the law librarian, I have encouraged the working out of legislative reference material conjointly, but along different lines, by the head of the Law department, and by the legislative reference assistant. While the assistant last mentioned has pursued her researches through the newspapers, the magazines and the book reviews, and by the annotation of books and pamphlets of wide range on subjects directly and remotely affecting legislation, the law librarian has been making elaborate references to many and various cases involving issues certain, or likely, to be the subject-matter for consideration in future general assemblies, also references to articles and paragraphs in current law and general periodicals bearing upon legislation in other states and countries, in anticipation of future consideration by the legislature of our own state.

During the past two years, I have been more than ever impressed with the intimate relation existing between the law and the legislative reference material. The latter must necessarily hark back to the former. It may be that the refusal of the Thirty-second General Assembly to create a legislative department will result in the working out of a practical reference system more valuable than the one which, three and one-half years ago, passed the house and failed in the senate. I do not deem it advisable to urge the creation of a legislative reference department separate and distinct from the state library, but would recommend that the appropriation for the state library be increased from fourteen thousand dollars ($14,000) to eighteen thousand dollars ($18,000), thus enabling the library board to strengthen the law and miscellaneous departments, for both of which the librarian finds it impossible to buy the books necessary to keep the general reference work down to date, and, at

the same time, to materially strengthen the legislative reference bureau, for the use of the legislature and executive departments of state.

COMPLETION OF THE INTERIOR OF THE HISTORICAL BUILDING.

I would respectfully recommend that the next General Assembly be asked to make an additional appropriation for the further decoration of the lobby of the historical building in a manner worthy the architectural importance of the building as a representative of the state's new departure in the artistic finishing of its public buildings. The art gallery and museum features of the historical department of themselves annually draw many thousands of visitors, giving the building a representative character such as does not pertain to mere office buildings. The Hon. James Harlan, in his address at the dedication of the historical building, referred reluctantly to Iowa's slow response to the popular call for beauty in public edifices, and pleaded for "proper means and stimulus for artistic culture." The plea has been met thus far by liberal appropriations for the completion of the building, and the state cannot afford to stop just short of completion by leaving the niches for statuary unfilled.

I would urge, for the use of the public, an appropriation suitable for the installation of an elevator connecting the basement and the second and third floors and attic of the historical building. As it is, a very large proportion of the visitors feel mentally unwilling or physically unable to visit the basement or the third floor, each with its rich collections of curios. Many even stop short of the portrait gallery and the library on the second floor, because of the hard climb. This loss to the public would be obviated by the placing of an elevator in the shaft provided for it.

CATALOGING

During the biennial period covered by the report—July, 1908, to and including June, 1910—of the 7,282 volumes added to the library 5,495 have been cataloged, the remaining number being government and state documents. In addition to the regular work a fourth complete inventory of the library has been taken.

ADDITIONAL ASSISTANCE NEEDED.

I would renew the claim of the library for additional assistance. The present staff in the law and general library is distributed as follows:

Two in the Law department proper. There should be at least three.

One engaged in legislative reference work.

Two in the Miscellaneous, or general library. There should be four—as will be explained farther on.

One in the cataloging room.

One in the bookkeeper's room.

There is great need of additional assistants in the miscellaneous or general library, with the first floor, the mezzanine floor and the second floor to look after. The three floors now occupied by the general library cannot be adequately covered by two assistants. Two additional assistants should be accorded this department, one for service mainly on the second floor, which now is little used because no one can be spared from the first floor, and the other to assist the library cataloger, also to assist in serving the public on the first floor.

BINDING AND REPAIRING.

During this biennial period the miscellaneous department has had bound the following number of volumes: periodicals, 1,125; books, 264; society publications, 142; documents, 132; library bulletins, 17; college catalogs, 16; almanacs, 13. Total, 1,710 volumes. Of this number, 10 volumes were handsomely bound.

During the same period, and in the same department, 264 books and 101 periodicals were repaired, making a total of 365 volumes rebound, rebacked or resewed. This gives a grand total of 2,075 volumes bound or repaired. The total cost of this work was $1,252.32.

CON

herewith attached, from
department of the State
commend my

I invite your attention to
my assistant, Mr. Small,
Library. All of its s
approval.

Also to the report
Library, whose stat
sideration.

definite results since my incumbency. We have reached a time when our hopes of long ago have at least partially matured and show results of patient industry.

Our task of recataloging the law department is well under way; our series of reports in many instances completed; our text books and legal periodicals in splendid shape; our literature of the law and the early statute law of the other states have had their share of attention; the foreign and colonial laws and reports make a good showing, and a legislative reference bureau has become a reality. All these things and more give us reason to feel that the state library is becoming worthy of our great commonwealth.

ACCESSIONS.

Twenty-five hundred and sixty-six (2,566) volumes have been accessioned during this biennial period, as compared with twenty-three hundred and sixty-two in my last report. The accessions of this period are the largest ever reported for the law department.

As you know, it is the policy of our board to purchase practically all the standard text-books and reports published in this and other states where the subject and character are such as to make them of interest to the patrons of the library. A reasonable sum has been spent on foreign works other than law reports, and special treatises not obtainable by exchange. The appropriation will not warrant a much larger scope of purchases than now made and leave anything for the completion of broken sets already in the library. The board made a generous provision that the librarian be permitted to purchase, from second-hand dealers and auction sales, out-of-print publications that only occasionally appear upon the market; this has enabled us to greatly strengthen the law library by adding to and completing valuable works such as journals and debates of the constitutional conventions in the several states, early statute law, history and jurisprudence.

EXCHANGES.

The library's appropriation for the purchase of books by no means adequately represents the value of its biennial accessions, as many of the volumes are obtained through exchange. It has been our purpose to obtain everything possible on exchange account, not only in this country, but throughout the world. Fre-

quently we lop off expensive volumes from the lists of former purchases and add them to the exchange list. Our exchanges now represent an annual saving of hundreds of dollars to the library. The codes and supplements given to the library by an act of the last legislature for exchange purposes have been of assistance and an incentive in furthering our exchanges with foreign countries. Though many of the foreign codes and reports are as yet unobtainable through this source, owing to their being of private publication, we are, however, gradually breaking down the barriers and increasing our exchanges.

LEGAL PERIODICALS.

It has been the aim of the law department to maintain as complete a collection as possible of the law magazines. We have many of the most important published in the English language and a few in foreign tongues are being received.

It is ofttimes desirable for readers to know whether or not a certain periodical is to be had in the library. And as a complete list has not been published for more than a dozen years, I am adding as an appendix to the list of purchases a complete alphabetically arranged check list of the legal periodicals now in the state library and ask that it be published as such.

BINDING.

Binding enters largely into the finances of the library. During the last biennial we have expended the sum of $578.14, against $428.55 for the previous biennial; each year adds to the binding expense—it will necessarily increase as the older volumes are rapidly breaking and the constant accession of the new unbound material lengthens our binding list.

We are using buckram largely and find it more durable than sheep and less expensive. I wish the state could be persuaded to use buckram in the binding of all laws, law reports and documents. Publishers of law books in all parts of the country report difficulty in getting first-class skins for binding. I would suggest that this matter be brought to the attention of the proper officials.

REPRINT OF EARLY LAWS.

I would recommend the reprinting of the early session laws of Iowa, beginning with the territorial session of 1840, to and including the session of 1854. Since the last named date there

are a sufficient number of volumes in duplicate to meet existing needs. The early volumes are exceedingly scarce and there is a demand for them as they contain matter of vital importance to the early history and jurisprudence of our state.

DOCUMENTARY MATERIAL.

We are endeavoring to collect and get together documentary material upon all subjects from all parts of the country. This entails much correspondence and painstaking labor. The richness of the material already acquired can only be appreciated by those who use it or come in contact with it. In this day of industrial and commercial activities it is necessary that all available documents be acquired. It has a tendency to harmonize our laws and to bring about more desirable legislation. Probably at no time in the history of our country has more interest been taken in the economic and sociological conditions than at the present time, and there is a general tendency toward uniform laws and reports.

A PLEA FOR MORE REFERENCE BOOKS.

A great deal of valuable reference material can be obtained from the publications of learned societies, associations, etc., that are issued from time to time. In some of these can be found articles upon various subjects by writers well known for their special study of the subject dealt with. It is gratifying to note that many cumulative indexes are being prepared in book form containing subject matter with cross-references thereby revealing a vast amount of material hitherto inaccessable. To the student desiring original material such helps are not only desirable but essential to successful investigation.

In Iowa, we have but a scant number of published works which bring out in compiled index form the contents of our various publications. First of all, I would call your attention to the special needs of topically arranged indexes to the session laws, the house and senate bill files, the governor's messages, and to the documentary material of our state. In this age of activities with the multiplicity of general and special legislation, reports and current publications, it is imperative that they be amply indexed, digested and made accessable. This great work confronts

asked for at a salary large enough to enable the board to employ a person qualified to act in any capacity; also, a stenographer for general work in the library; and that an appropriation and provisions for furniture, printing and supplies sufficient to successfully operate and maintain the reference bureau be asked for.

CONCLUSION.

In closing I extend to you my hearty appreciation for your courteous treatment of me; you have ever been in sympathy with my work and ever ready to advise, co-operate and assist in every way. To my associates in the law and other departments of the state library I tender grateful acknowledgement.

Respectfully submitted,

A. J. SMALL,
Law Librarian.

GENERAL LIBRARY ACTIVITIES.

To the State Librarian:

The increased number of those who consult the General Library indicates that this department is appreciated by the people of Iowa. The repeated requests for books and information, coming from various localities, show that the State Library is now looked upon as a source from which information may be obtained, and from which loans may be made of material which the smaller libraries do not possess and are not able to acquire. The reference use of the library has greatly increased during the past biennial period—a large number of questions having been answered both in the library and by mail and telephone. Many books on particular topics have been placed on reserve for special use by clubs, classes, debating teams, and individuals from all parts of the state, doing special research work.

Almost every Saturday during the winter months individual students or debating teams from neighboring towns and the colleges of the state come to Des Moines to use the library. Here also are found daily the students from the colleges of Des Moines, and pupils from the schools of the city and outside towns gathering data needed for theses and debates. The library is much frequented by club women and professional men, also by government, state and city officials who are interested in water-ways, good roads, civic improvement, and kindred subjects.

GENERAL LIBRARY ACTIVITIES.

To the State Librarian:

The increased number of those who consult the General Library indicates that this department is appreciated by the people of Iowa. The repeated requests for books and information, coming from various localities, show that the State Library is now looked upon as a source from which information may be obtained, and from which loans may be made of material which the smaller libraries do not possess and are not able to acquire. The reference use of the library has greatly increased during the past biennial period—a large number of questions having been answered both in the library and by mail and telephone. Many books on particular topics have been placed on reserve for special use by clubs, classes, debating teams, and individuals from all parts of the state, doing special research work.

Almost every Saturday during the winter months individual students or debating teams from neighboring towns and the colleges of the state come to Des Moines to use the library. Here also are found daily the students from the colleges of Des Moines, and pupils from the schools of the city and outside towns gathering data needed for theses and debates. The library is much frequented by club women and professional men, also by government, state and city officials who are interested in water-ways, good roads, civic improvement, and kindred subjects

LOANS.

Though this is a reference library, conditional loans are made to libraries, state officials, educators, members of study clubs, and other special students who are doing individual work and are unable to supply their needs at the local libraries; also to the Iowa Library Commission, supplementing the commission's work throughout the state. All loans are made subject to the judgment of the librarian, as by statute indicated. All books loaned are subject to immediate recall if needed.

ATTENDANCE.

It should be remembered that a very limited number of people come to the State Library to read for mere recreation. They usually have some definite object in view. An attempt has been made during the last biennial period to keep a record of those using that part of the General Library which is shelved in the Historical Building, and while it must necessarily be inaccurate it will be an under rather than an over estimate, as the busy hours are those in which the record is neglected. The daily stream of visitors and sight-seers passing through the library has not been included. The following is an approximate summary of the number of those who have consulted the library during the biennial period:

July 1908 to July 1909.		July 1909 to July 1910.	
July	381	July	565
August	503	August	460
Sept	639	Sept	703
Oct	977	Oct	1160
Nov	813	Nov	1247
Dec	826	Dec	928
Jan	1096	Jan	1510
Feb	1673	Feb	1563
March	1756	March	1553
April	1451	April	1210
May	1136	May	1299
June	700	June	840
	11,951		13,038—24,989

NUMBER OF BOOKS USED.

The number of books and periodicals consulted by the several readers in a reference library varies from one to several dozen volumes. A careful estimate made in one of the leading reference [illegible] of this country gives four as a conservative estimate of

the average number used by each individual. This would indicate that at least 99,956 volumes have been consulted in this part of the library during the biennial period.

SHELVES.

Since the removal of the greater part of the General Library from the State House to the east wing of the Historical Building in 1908, it has become necessary to increase the shelving capacity of the main and mezzanine floors. This was accomplished by ordering additional steel shelves from the factory and readjusting the shelves already in place. By making an octavo arrangement of all but the lowest space which is reserved for quarto and folio volumes, it was possible to add one shelf in each section. This extra shelving provided space for seven thousand volumes and for the present relieves the situation on the two lower floors of the library.

CLIPPING.

The clipping of certain classes of material from newspapers is continued, and the collection is increasing in size and value. The preservation and the handling of this material are greatly facilitated by the use of the steel vertical filing case which has been installed in the General Library.

ACADEMY OF SCIENCE.

As the result of an arrangement made some years ago, the State Library receives the exchanges of the Iowa Academy of Science. A check list of these publications is kept as they are received, and the files are preserved. A part of these volumes are bound when completed, and are then cataloged and become part of the library. Many scientific publications, both foreign and domestic, are included in this valuable list of accessions.

AGRICULTURAL EXPERIMENT STATION CATALOG.

With the assistance of the Iowa Agricultural Department, the Agricultural Experiment Station Catalog cards printed by the government have been secured for the State Library. These are now being filed and arranged for the use of those who are interested in material on the subject of Iowa's most important branch of industry.

Few people realize what large sums are expended every year by the United States, and the several states as well, upon Agricultural Experiment Station work. Nor do they realize the great mass of literature which has been published during the past

twenty years, showing the results obtained and the recommendations offered by those engaged in this work. Complete files of these reports, bulletins, and circulars are scarce; but this library is fortunate in having by far the greater part of these on its shelves, and a vigorous effort is being made to complete the files so far as it is possible to do so.

Owing to the valuable material therein contained, the Departmnt of Agriculture at Washington has printed a catalog index consisting of thousands of cards, covering all of these publications, thus placing this great wealth of material where it will be accessible to all. The securing of this catalog, which indexes the material already published, and provides for additional cards for further publications as they appear, is of inestimable value to the library and the state.

ASSISTANCE.

The increasing demands made upon the General Library continue to make it a busy place. The real work of a library does not consist (as is popularly supposed) in the mere placing of the books before a reader and returning them to the shelves, but rather in the selecting, securing, preparing, cataloging and maintaining these volumes. So rapidly has the library advanced along its various lines of activity, that the present corps of workers is found to be entirely inadequate. It seems best, therefor, for the credit of the library and the state, to urge upon the General Assembly the necessity of adding at least two new assistants to the staff of the General Library.

Respectfully submitted,

HELEN M. LEE,

First Assistant Librarian.
